## Americana Fully Adjustable Leveling Air-Ride tames off-level camping spaces

**Side to side sloping** campground spaces are unfortunately quite common. Here we are near Conway, Arkansas, down by the river and this was our assigned space. That is our “new” ‘96 F350 Diesel crew cab dually in the foreground and an Americana

SKP model . . . leveled, on the camping site. Without backing up over wood blocks, the unique Americana leveling air-ride, adjusted this situation! We simply pumped up the low side (to the right) and let the “air” out of the high side (to the left).
